

Figure 1 consists of 12 sub-graphs labeled (a) through (l), each showing the growth of *E. coli* O157:H7 over time (0 to 120 hours) under different conditions. The y-axis represents log₁₀ CFU/g, ranging from 0 to 10. The x-axis represents time in hours, ranging from 0 to 120. The graphs show various growth curves, including control, heat treatment, and different chemical treatments.

- (a) Control: Shows a steady increase in log₁₀ CFU/g from approximately 2.5 to 10.0 over 120 hours.
- (b) Heat treatment: Shows a decrease in log₁₀ CFU/g from approximately 2.5 to 0.0 over 120 hours.
- (c) Chemical treatment: Shows a decrease in log₁₀ CFU/g from approximately 2.5 to 0.0 over 120 hours.
- (d) Chemical treatment: Shows a decrease in log₁₀ CFU/g from approximately 2.5 to 0.0 over 120 hours.
- (e) Chemical treatment: Shows a decrease in log₁₀ CFU/g from approximately 2.5 to 0.0 over 120 hours.
- (f) Chemical treatment: Shows a decrease in log₁₀ CFU/g from approximately 2.5 to 0.0 over 120 hours.
- (g) Chemical treatment: Shows a decrease in log₁₀ CFU/g from approximately 2.5 to 0.0 over 120 hours.
- (h) Chemical treatment: Shows a decrease in log₁₀ CFU/g from approximately 2.5 to 0.0 over 120 hours.
- (i) Chemical treatment: Shows a decrease in log₁₀ CFU/g from approximately 2.5 to 0.0 over 120 hours.
- (j) Chemical treatment: Shows a decrease in log₁₀ CFU/g from approximately 2.5 to 0.0 over 120 hours.
- (k) Chemical treatment: Shows a decrease in log₁₀ CFU/g from approximately 2.5 to 0.0 over 120 hours.
- (l) Chemical treatment: Shows a decrease in log₁₀ CFU/g from approximately 2.5 to 0.0 over 120 hours.
